

Overview: Accessible Databases in 2021

Charles University and its faculties are buying a lot of bibliographic and full-text databases. Take a look at the list of databases that can be used in 2021.

Some of the resources are available to all users of the whole Charles University and some are accessible only by the users from particular faculties. **In bold** are resources that have been bought for the whole Charles University, *in blue* are resources that are accessible only for the Faculty of Arts. You may access all databases via the eResources Portal <https://eresources.cuni.cz/>. Most of the resources are searchable by the search engine UKAŽ (<http://ukaz.cuni.cz/en>). **Resources, which are not searchable with the search engine, are marked with an asterisk.**

The full list of resources (including the resources bought by other faculties and open-access resources) is on the eResources Portal – <https://eresources.cuni.cz/>. The resources bought by other faculties differ in the terms of access based on their licence agreement and these terms may vary.

In 2021, the following databases are available to the users of the Faculty of Arts[1]:

- **Academic Search Ultimate (EBSCO)**
- **ACM Digital Library**
- **ACS Publications**
- **American Association for Cancer Research Publications**
- **American Institute of Physics – Complete**

[1] Note: **In bold** are resources that have been bought for the whole Charles University, *in blue* are resources that are accessible only for the Faculty of Arts. The asterisk marks

resources that *are not* searchable and accessible via the search engine UKAŽ.

[2] On *Oxford Scholarship Online*, there is available an extensive book collection in the so-called *Evidence-Based Acquisition* regime. This means that the users have access to more than 18,000 eBooks on *Oxford Scholarship Online* until **10 November 2021** and, then, the statistically most used titles will be permanently bought.

[3] On the *SAGE Knowledge* platform, there is available an extensive book collection in the so-called *Evidence-Based Acquisition* regime. This means that the users have access to more than 18,000 eBooks on *Oxford Scholarship Online* until **11 November 2021** and, then, the statistically most used titles will be permanently bought.
