

# Therapy Dogs and Hippotherapy at Faculty of Arts, Charles University

Since the opening of the main building of CU FA after the tragic events of December 2024, students and staff can regularly meet Snow, a therapy dog, in the corridors. The range of therapy animals and their human companions is gradually expanding.

At the moment, Snow and Stella offer their therapeutic support:

When and where: **usually Tuesdays and Thursdays** in the main

building of CU FA.

**Monty** will be coming to the main building in April. Monty is a minihorse in hippotherapy training. He will be at the main building on Wednesday, 17 April, and Thursday, 25 April 2024.

We are proud of our ongoing hippotherapy and dog therapy programs at the faculty. Based on feedback, these activities positively impact the psychological well-being of our students and staff affected by the tragic events in the building.

The contact person for questions and “requests” for animal therapy is Michaela Slussareff, Vice Dean for External Relations and Lifelong Education.
