## Information systems

### **The Central Authentication Service (CAS)**

You can **change your password** here, manage your account and identity in Charles University systems.

### **Student Information System (SIS)**

Covers most of the study-related agenda.

### **Moodle (Learning Management System)**

Charles University teaching staff have the option of developing and providing courses online, either as distance courses or as blended- learning courses (combination of online course with in-house instruction). The only thing users – both teachers and students – need is a standard browser. The system is operated on Computer Science Centre (CSC) servers; the CSC is in charge of operations and support.

### **WHOIS**

Centralised registry of persons (employees, students, lifelong learning participants, etc.), CU organisational structure and

personnel data.

## **Charles University Digital Repository**

Archiving system providing access to various forms of electronic documents, including university degree theses of CU FA students.

## **Charles University Web Applications**

Review page with links to web applications (Study, Whois, Bursaries, Grant Agency of CU, Mařinka, Erasmus, Grant registry, OBD)

## **Mařinka**

An application designed for the submission of electronic applications for accommodation in dormitories of Charles University.

## **Distance learning**

- Microsoft Teams – Manual for Students of CU FA
- Microsoft Teams – Manual for External Students
